Omni LT Package -$2,350*

A great and economical package for homes, townhouses, condos and apartments. When installed it will be a complete security system that monitors up to 4 exterior doors and 2 interior motion sensors, with the ability to add more sensors. This system can be remotely monitored via a telephone connection. It will be integrated with the HVAC system to manage its operation. It is also X10 and UPB enabled to control any number of devises such as light switches and light modules.

Package includes the following:

- HAI Omni LT Controller with locking Enclosure (8 zones, expandable to 24)
- One Flush Mounted Omni Console
- One Omnistat Single-Stage Heat/Cool Thermostat RC-80
- One Indoor/Outdoor Temperature Sensor
- One PC Serial Connection Cable
- One UPB Powerline Interface Module
- One RJ-31X Phone Connection
- Power Transformer and Backup-up Battery
- System Manuals
- Up to four Recessed Door Sensors
- Up to two Dual Technology Motion Sensors with Swivel Mountings
- 2-22 shielded wiring to all Door Sensors
- 4-22 shielded wiring to all Motion Sensors, Thermostat, Console and one Temperature Sensor
- System fully installed, documented and tested
- Up to 10 custom macros programmed as requested by the customer
- User training and turnover of the system
- 24 month manufacture and installation warranty

This package can be modified for your specific needs. Call and set up a review of your needs for a custom design and estimate.
